

Less downtime. Lower costs. Zero camera rip & replace.

See first-hand how IT teams in the retail space achieved return on investment (ROI) with Solink.

Solink is a cloud video security and analytics platform that helps IT teams modernize physical security and operational insights within the retail industry without costly infrastructure upgrades, all while reducing maintenance time, minimizing disruptions, and maintaining total system visibility.

Solink ROI by numbers

More time for what matters

Monthly IT maintenance fell from an average of **15 hours to 6 hours**, giving back an entire free day for other projects.

Fixing issues before they escalate

Mean time to repair (MTTR) has been recorded falling **90%** from 56 hours to just 5.59, helping retail IT teams to protect revenue.

Staying online and always protected

System downtime incidents have dropped **64%** from 11.09 to just 4 per year, ensuring retailers avoided major disruptions.

Fewer tickets, less busywork

Monthly IT maintenance tasks dropped **46%** from 4.18 to 2.27, a savings of \$2,000–\$5,000 annually with Solink.

Total ROI: \$18,000+ in annual savings

From reducing theft and false alarms to cutting IT workload and travel time, Solink delivers real, measurable impact. It's estimated, on average, our customers save \$1,500+ per month for each store - that's more than **\$18,000 per year for each location** - by streamlining operations, protecting assets, and making smarter, faster decisions.
