

# Get more value out of every bay

Learn how Solink turns your existing cameras into a powerful profit-driving tool, helping you catch fraud, speed up bay time, prevent drive-offs, and fix operational blind spots fast.

Backed by real results from oil change shops just like yours, Solink gives your team instant visibility to make smarter decisions and boost your bottom line.

## Solink ROI by numbers

### Eliminate DVR replacement costs

Most shops spend \$3,000 on DVRs every five years. Solink's cloud platform replaced on-site recorders, saving \$600/year per shop.

### Cut discount fraud in half

Discount misuse currently costs operators 0.5% of sales, which is roughly \$5,000 per shop, per year. Solink cuts that in half, delivering a \$2,500 per year benefit for each shop.

### Automate investigations

Typical oil change shops run four investigations per year, eating up four hours at \$50/hour. Solink reduces that workload by 64%, freeing your team to focus on higher-value tasks.

### Fewer drive offs, more revenue

Improve speed of service with real-time notifications of excessive bay times. By capturing just one additional car per day - at \$50 in revenue - Solink helps shops generate **\$15,000+ in annual revenue uplift per location** (based on 313 operating days per year).

### Reduce false alarm charges

With monitoring in place, Solink cuts false alarm expenses by 50%. That's \$100 saved per shop, per year. At scale, the savings add up fast. For a **50-shop chain**, that's **\$5,000 saved annually** on unnecessary callouts.

## Annual ROI: \$18,500+ improvement per shop

From preventing drive-offs to reducing fraud and wasted time, Solink delivers **\$18,000+ in net financial impact per year, per location**. Our customers unlock profit hidden in daily operations, with no rip-and-replace required.
